How to set up voicemail greeting on iphone

10/10/2017

It's not funny when you lose a phone call, but it happens occasionally. the caller can leave a voicemail if the call was important enough, and sometimes they will leave one when it was not. That said, no one wants the voicemail section of the phone to be cluttered with old messages. Fortunately, you can save them directly on your iPhone or on your pc, so clean up the space and preserve valuable messages for future reference. depending on which carrier you have, this process can be done on your phone or using a third party program. In both cases, saving voice messages is not difficult, and with this guide, you will be saving the missed messages and organizing your voice mailbox in no time. how to save voice messages by oando your iphone this will be the easiest method, as long as you are oando ios 9 or later and your smartphone support supports visual voicemail. visual voicemail is the list of voice messages you should see when you go to the phone > voice. vectors like AT&T and Verizon support this function, and it is easy to configure. if you are not sure if your carrier supports visual voicemail, your operator's support page or customer support department should be able to let you know. if you can use visual voicemail, it is easy to save your voicemail using your iPhone. That's how. Step 1: Start the phone app and select the voicemail tab in the bottom right corner. Step 2: Touch the secretariat you want to save, followed by sharingThe icon looks like a box with an arrow pointing out of it. Step 3: In the resulting pop-up window, choose a rescue position for the voice mail. You can add it to the Notes app, save it as a Voice Memo or send it to contacts via Messages. You can also email the audio or upload it to iCloud Drive. Step 4: For any message you do not need to save, tap Delete in the bottom right corner. How to save voicemails using Explorer 4 If you cannot use Visual Voicemail or want another method, there is always Explorer 4. The program allows you to save many things from your iPhone, including text messages, call history and other media stored on your device. The program starts at \$40, but you can download it for free and use it in demo mode if you do not want pony up cash. First, you will need to install iTunes on your PC, as you need your phone to trust your machine before the two interact. We also recommend you back up your iPhone because Explorer 4 will discover all missing or lost files from that backup storage. If you do not have a complete backup of the established system, the software will automatically do one, but it is a long process. Once iExplorer installed and made a backup, connect your iPhone using a Lightning cable. When you open the program, you should be able to see your iPhone comes on the left side of the app display. When it does, select your iPhone and click data > Voice on the right side. You can alsoyour iPhone, click the drop-down arrow next to it, and go to backup > item. Once done, your voicemails upload into the main window of the program, and you will see the contact, the date of the voicemail or the call, and the duration of the voice message. to save voice messages, select them individually and click the Export button below. you can click on export everything to simultaneously save all voice messages. editor recommendations maybe is your first new iphone in years, never, or part of an Apple update plan where you exchange a new phone every year. Regardless of which it is, getting a new iPhone in your hands is always exciting and worth waiting. now that you arrived and unregistered, there are some things you should do to make sure you enjoy securely your new laptop. apple offers different configuration options, ranging from scratch to restore data from a previous phone via backup. We will accompany you through all options. If you have just collected a new iPhone 12, then do not forget to check our articles for the best iphone 12 cases, the best iphone 12 mini cases, the best iphone 12 cases pro, and the best iphone 12 cases pro max. backup and restore opens your new phone with a complete backup either via icloud or in the finder using the latest mac operating systems — catalina and big sur. for cataline macos, connect your old iphone to the mac, open a new finder window and select your iphone in the left column window. in the backup section,Back to All data on your iPhone to this Mac. Check Encrypt Local Backup means you will need a password, but it conveniently includes your confidential health data in backup, so that it is to you. Click Back Now. Restore from backup to new phone to facilitate a seamless transition of the receiver. Instead of backing up on your Mac, you can back up entirely in iCloud via Settings > iCloud > Backup. For MacOS Mohave or before, the process is similar, except that you use iTunes to facilitate backup. See our full guide on how to back up your iPhone. Quick Start Data Transfer If you do not want to start setting the new phone from scratch, use Apple's Quick Start function to transfer all data. This operation requires iOS 11 or later and will take care of both your old and new devices simultaneously, then plan accordingly. Place the old and new phones close together, and a dialog box appears asking you to transfer the data to the new device. Point the current phone camera to the new phone with cloud animation, and then enter the access code. Complete this task transfers all settings, the layout of the home screen and photos from the old phone to the new phone. It will also re-download all current applications on the new phone. This means that you will automatically get all new app updates installed along with your saved data. You can also use a wired connection between the two phones via a Lightning to USB 3 camera adapter and lightningUSB cable. I entrust you iPhone can already be charged at least half when you receive it, but you should top 100% right away just to start. You can use a charging cable, a fast charger, a MagSafe charger or a Qi wireless charging pad. Check out our complete guide to quickly recharge your iPhone and our list of the best chargers and quick accessories out there. Face ID and Apple Pay These are two great features that you are asked to set up, but you do not need to do so immediately. If you have installed Apple Pay on your old phone, you will still have to set it on the new phone, as the information has been deleted during the transfer for security reasons. If you use an access code, you can get away with not setting Face ID, but you will need it if you want to use Apple Pay. Apple Sync Watch If you own an Apple Watch, you'll want to match it to your new phone. First, make sure your watch is running WatchOS 7. The rather long process involves apairing your watch with your older iPhone. Tap Info > Unpair Apple Watch and then enter the iCloud password. You can also match your watch on your phone via Settings > General > Restoration. Check out our full guide on iPhone pairing with your Apple Watch using iOS 14 and WatchOS 7. Set Medical ID Make sure you register emergency contacts by setting your medical ID in the Apple Health app. Open the Health app on your iPhone, tap Summary at the bottom of the window and locate Set Medical ID. Tap Start to registerdate of birth and other health information. Scroll down to find the Add Emergency Contact button and touch it. That tap brings you to your contacts, where you can touch the contact you want to record and designate their relationship with you. If you set up your Apple Watch, it comes that contact information from your medical ID. Check out our comprehensive guide on how to configure Fall Detection and Medical ID on your iPhone and Apple Watch. The big swipe With iPhone 12, you get a maximum display because there is no home button. Those who upgrade from older iPhone will need to learn a number of quick gestures that will become the second nature in a few minutes. Here are some of the main. Access app: scroll up from the bottom bar. Go home: scroll from the bottom of any screen. Application switch: scroll up and then left or right along the lower edge of your phone to find and view open applications, and then flick on any app tab you want to close. Control centre: scroll down from the top right. If you want to know more, you can also check the guide we created on how to reset an iPhone.
